

Lulamile Mkhungela

Senior Product Designer and Front-End Developer

Johannesburg, Gauteng · mkhungela.l@gmail.com · linkedin.com/in/lulamile-mkhungela

Profile

Over the past 8+ years I have designed and built digital products across enterprise software, telecoms, automotive, public sector, fintech and small business, from user research and Figma design systems through to production React and Angular code, WCAG 2.2 AA compliance and UAT.

I enjoy turning complicated workflows into interfaces that feel obvious, and then writing the front end so nothing gets lost between the file and the screen.

Currently

Embedded design and front-end authority at iOCO, plus select product, web and brand work directly with founders and teams.

Selected highlights

- 92% UAT acceptance on the Vodacom Engage employee app, the highest score in that digital portfolio at the time.
- Cut UI inconsistencies by 65% with a new design system and Design Authority governance at Vodacom.
- Lifted sprint velocity 35% with a shared component library across two products, delivered freelance for AddmoreDigital.
- Increased checkout completion 32% and average order value 18% by taking a 7-step flow down to 3.
- Shipped a 6-micro-frontend architecture and a 13-endpoint notifications system for a national audit platform.

Experience

iOCO · 2021 – present

Embedded design and development authority for Eskom, a national audit institution, a financial services group, a global pharmaceutical company, Toyota South Africa, a listed energy group and Vodacom.
